

Industrial Vacuum Cleaners

GB 726
GB 826

**Reliable and
powerful
cleaning**

Boost productivity and clean more efficiently with powerful, effective suction

Productive

User friendly

Quiet

Easy to service

Effective filtration

For machine cleaning, spillage pick up and suction at source

Continuous and effective suction of dry dust and heavy solids is the speciality of the rugged GB 726 and GB 826. These vacuum cleaners boost productivity, keeping your cleaning time to a minimum.

Every Nilfisk machine is easy to use and highly productive, built to last for decades and backed by an incomparable commitment to customer service. Nearly a century of professional cleaning experience means you get an expert partner when you buy Nilfisk. We can advise you on everything from safety standards and regulations to filtration needs and provide you with the solution to your specific tasks.

- For medium to heavy-duty industrial cleaning tasks
- Pick up sharp and heavy solids
- Rugged design allows work in all environments
- Superior dry filtration system has long-lasting Nilfisk cotton or GORE-TEX® main filters
- HEPA or ULPA exhaust filter options when suction of hazardous dust
- A large variety of dust bag systems is available

Built for constant use

GB 726 GB 826

The GB 726 and GB 826 effectively suction everything from fine dust to larger solids. The vacuum cleaners' three-phase motor provides a very high, constant suction power, making them especially suited to running all day. These powerful machines are ideal for suction at source, machine cleaning and spillage pick up. With their compact, oval design, they run smoothly through narrow aisles. They feature a 16,000 cm² main filter for superior filtration and constant airflow, a 46-litre dust container and a built-in sound suppression system.

GB 726

Ideally suited to frequent cleaning in manufacturing areas, for example suction of dry dust in the food and chemical industry. 1,900 W of power, 480 W suction power and 14.7 kPa vacuum competently handle dust and heavy solids in all industries.

Food and beverage industry.

GB 826

As ideal for heavy industrial applications like heavy dusts and hard metal as it is for the filtration of fine dust. Five-stage fan unit, 3,000 W of power, superior 670 W suction power and 22.5 kPa vacuum.

Iron and metal industry.

GORE-TEX® quality filters

The GB 726 and GB 826 can be fitted with high-quality GORE-TEX® filters. The Nilfisk filtration experts offer solutions to the most stringent regional regulations regarding dust handling.
