setting standards

Silent power

The ingenious design of the GD 930 optimises air flow patterns and reduces energy losses to an absolute minimum. The result is tremendous suction power with just a gentle humming background sound. For even quieter operation in noise sensitive operations such as work hour cleaning in offices, or hospital ward vacuuming, the GD 930 S2 offers two-speed variation to cut the sound level to 49 dB(A)*.

The quiet efficiency of the GD 930 allows it to be used during working hours

The large wheels, castor and low profile of the GD 930 make it exceptionally easy to use

Quick and simple access to internal parts

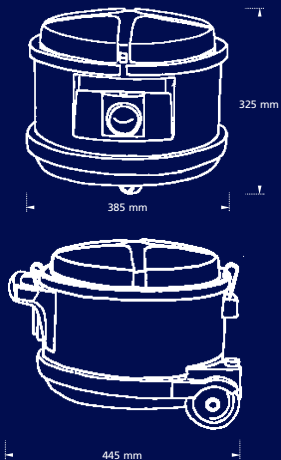

Excellent filtration

The multi-layer filtration that is standard on all GD 930 units efficiently captures even microscopically small particles and prevents them from being exhausted back into the atmosphere. Where cleaning is critical, an optional HEPA filter capable of capturing 99.997% of particles down to 0.3 microns is available.

- High performance
- Quiet 49 dB(A)* (S2 version)
- Rugged, heavy-duty construction
- Sturdy steel container
- Wide working radius – 15 m cable
- 15 litre dust bag
- Combine with NilfiskMop for up to 20% extra productivity
- Telescopic tube on S2 for extra comfort
- Stable – low centre of gravity
