Even a Gerni vacuum cleaner needs care and attention sometimes. The VAC series has been improved in design and performance, making it one of the market's most complete series of vacuum cleaners.

**VAC 05**  
A handy and practical domestic-type vacuum cleaner, ideal for indoor cleaning of offices, hotels and households etc. Comfortably quiet.

**VAC 10**  
A handy but strong low-noise dry vacuum cleaner, ideally suited to the cleaning of offices and institutions, as well as small businesses.

**VAC 100**  
A compact and efficient wet/dry vacuum cleaner that easily takes care of minor tasks both indoors and out, including light wet/dry tasks in the auto and craft industries and in industry generally.

## WET AND DRY VACUUM CLEANERS

Gerni's vacuum cleaner range can fulfil any requirement for efficient cleaning – whether it be lighter cleaning in hotels, offices and institutions, or heavier duties in the motor trade, industry and agriculture.

The series includes a number of wet and dry vacuums that are particularly user-friendly. This minimises the risk of operating errors and unnecessary wear on the appliances. They are manufactured from shockproof material and equipped with optimal motor power to extend their service life. Paper dustbags are available for all models (except VAC 600).

**VAC 400**  
A popular category of efficient wet and dry vacuum cleaners, with excellent motor power and suction. Ideal for many cleaning tasks in industry, the auto/transport sector, trade and agriculture.

**VAC 590**  
The ideal wet/dry vacuum cleaner for larger tasks. Its sturdy design and easy-to-use controls make it highly suitable for use on the shopfloor, in workshops, in agriculture, trade and construction sites.

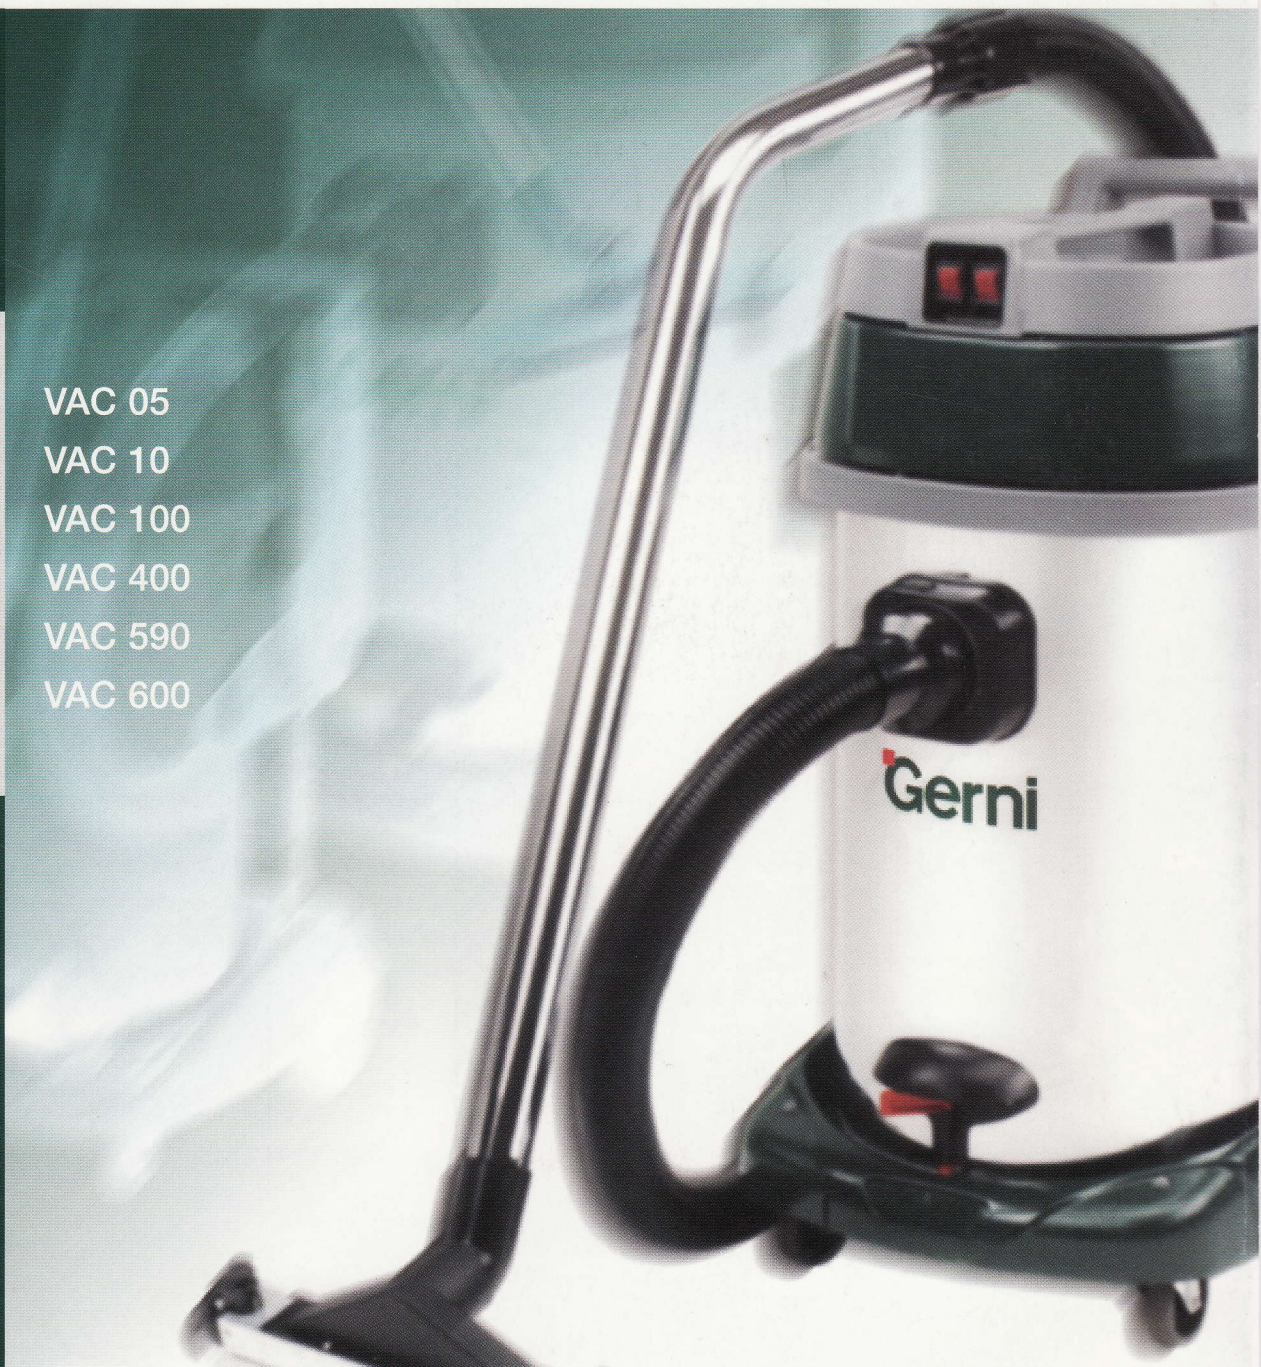

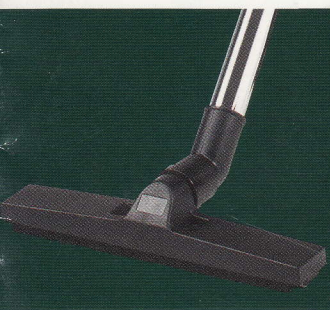

**VAC 600**  
This is the perfect wet/dry vacuum cleaner for heavy-duty cleaning tasks, with high-power suction and 3 motors, to be connected as required. It is particularly well suited to large or heavy-duty cleaning tasks in industry, the emergency services etc.
